Logging

The loggers started harvesting trees surrounding RMR. The first thing you'll notice is the removal of trees behind the lab/cabin building. This will facilitate an increase in our parking area. Ross says it "looks good."

Gallup Survey

Later this week we'll be distributing an "Employee Engagement" survey to provide us with a baseline. The intent is to measure how the changes in the organization (structural, procedural, etc.) affect the operations of Monroe. Baseline now. Implications in about a year. Thanks, in advance, for your cooperation.
